Boiler Draft Fans

2-Second 50% Sags

2 Second Sag 50-250kW  
Voltage Regulator/Booster

Application

Boiler Stoker Fans for baby formula pasteurization process

Ride Thru Reason

- VFDs controlling the Boiler Stoking Fans would trip due to 50% AC line sags
- Product losses due to interruption of the pasteurization process

Sales and Logistics

- Product - Single VFD 100kW UPD Sag Systems
- Bonitron Model Number - S3460SR-H100-DD4-D82
- Distributor - Kendall Electric
- Project Total Cost - 2 UPD Systems \$45,273.00

Customer ROI

Damaged product losses and production down time reduced
