

1398 Ultra Plus PSM Legacy Solutions

Common Bus Solutions

BONITRON

MRA B1398PS

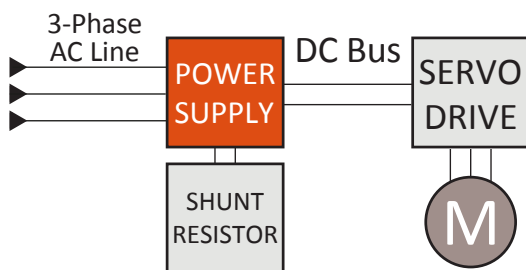

Bonitron is the source for 1398 Ultra Plus Power Supply Module Legacy Solutions.

The Bonitron MRA B1398PS 3-Phase Power Supply is a direct replacement in both fit and function for the 1398-PSM-125C power supply module. The Bonitron Power Supply also includes improvements such as easy-to-access fuse and power terminals.

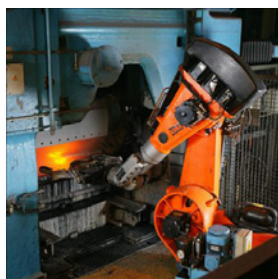

As an Encompass Partner, Bonitron strives to offer only the best solutions for Rockwell Automation Allen Bradley Drives. Visit bonitron.com/drive-ab.html to discover additional cross references matching Bonitron Braking Transistors, Resistors, Line Regeneration Units, or Single Phase Power Supplies with your drive.

Product Highlights

- Size and function equivalent to the 1398-PSM-125C
- Precharges DC Bus capacitors
- Diagnostic indicators
- Built-in shunt transistor for dissipating regenerated energy as well as fast shutdown

Industry Applications

Specifications

Input Voltage.....	100 - 240VAC, 3-Phase
Intermittent Duty Limit.....	150% Full Load Rating for 60 seconds
Precharge Time.....	2 seconds
Full Load Rating.....	100 ADC
Peak Current Rating.....	450 ADC
Indicators.....	Phase Loss, Overtemp, Disabled, Ready
Operating Temp.....	0°C to +55°C
Storage Temp.....	-20°C to +65°C
Minimum Ohm Rating.....	4 ohms

Additional Common Bus Solutions

Single Phase Power Supply

M3712

- 230 - 480VAC
- Power 3-phase drives from a single phase source
- No need to oversize/derate 3-phase drive
- Ideal for remote applications

Line Regens

M3545 & M3645

- Return regenerative energy to AC line
- No resistor needed
- 208 - 600VAC
- Up to 150A per unit
